

Columbia Summer Science Program:
Ecology and Sustainability in
VENICE

Using an interdisciplinary lens, examine ways in which contemporary Venice confronts sustainability challenges and develops resilience. Gain a basic understanding of its rich biodiversity and complex ecological system!

Students can partially fulfill the Science Core Requirement!

On this program, you will take a course co-taught by Columbia and University of Warwick faculty members that explores the environmental, social, and economic aspects of past, present, and future threats to a sustainable Venice.
