

GLOBAL COLUMBIA   

# COLLABORATORY

Deepen your understanding of global health, environmental humanities, and U.N. Sustainable Development Goals **virtually** and **in-person**

## REFLECT. IDEATE. COLLABORATE.

Through global seminars, small group meetings, and working on a collaborative project for the local NGOs you'll learn about environmental and global health realities in **The Gambia, West Africa!**

- Examine contemporary challenges arising from global environmental change and deepen your understanding of biodiversity, conservation, WASH, and community health.
- Understand how NGOs, government agencies, and communities are working collaboratively to address sustainable development challenges to achieve the SDGs.
- Gain hands-on experience through a 3-week in-country field experience and take your learning outside the virtual space!
